

# OpEx Software Platform

# About Us

At Appcarter, we specialize in delivering cutting-edge IT solutions and expert consultancy services designed to meet the unique needs of your business. Our focus is on creating powerful SaaS-based platforms and custom digital solutions that help solve common challenges across various industries.

Our Core Services

**SaaS Product Development:** We build scalable, secure, and user-friendly SaaS platforms that enable businesses to leverage cloud-based solutions for greater flexibility and efficiency.

**Custom Digital Solutions:** From enterprise software to industry-specific applications, we design and develop custom digital platforms that solve complex problems and cater to your business's unique requirements.

**Consultancy Services:** Our domain experts provide deep insights and strategies that help organizations optimize operations and drive business growth. By understanding specific challenges and objectives, we deliver actionable plans that align with business goals, ensuring sustainable success in an ever-evolving market.

**Engagement**

EHS  
**Excellence**

# *moving towards* **Integrated Eco System**

## Features

- Links people, processes, and data across Continuous Improvement, Employee Engagement, EHS, Audit & Compliance
- Avoids data silos
- Accelerates problem-to-solution cycle
- Improves management visibility
- Strengthens audit readiness
- Improvement idea observed during Gemba converted to Kaizen automatically
- Risk of reported Near miss assessed via HIRA
- Repeated LPA deviation escalated to quality audit
- Incident investigation results PTW checklist update
- Due legal compliance triggers safety inspection
- Supplier Audit checks legal & quality compliance Non-compliance linked to Legal Register

## Benefits

- Single login to use all OpEx tools
- Faster improvement cycles
- Enterprise-wide visibility
- Root cause visibility across tools
- Reduced repeat issues
- One platform, one login, multiple modules

# Continuous Improvement

## **GEMBA**

A Digital Gemba tool digitizes Gemba Walks—enabling leaders to observe, record, act and improve directly at the place where value is created

## **5S**

Digitizes 5S audits, action tracking, and sustainment, helping organizations maintain workplace discipline and visual order consistently across zones

## **KAIZEN**

Enables organizations to capture, evaluate, implement and sustain continuous improvement ideas in a structured, transparent, and measurable way

## **CUSTOM**

Your space to add custom module as per organization's need

**GEMBA**

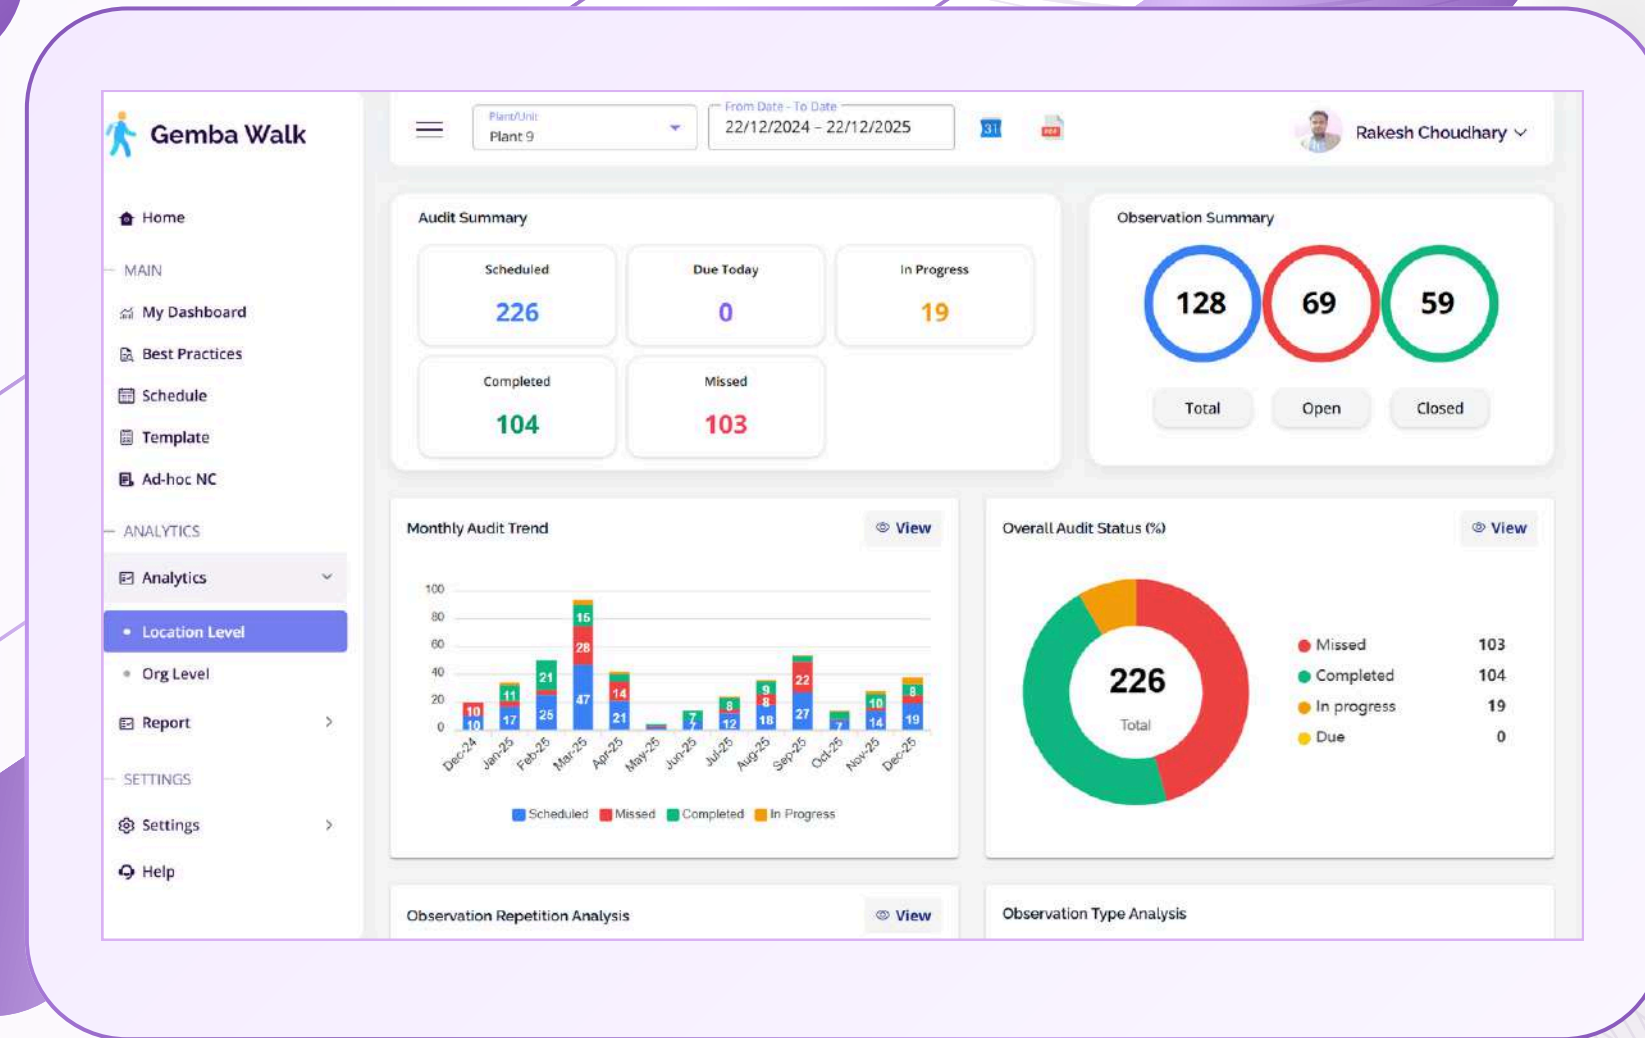

Digital Gemba is a structured, paperless system to plan, conduct and track Gemba Walks using mobile, tablet, laptop devices, enabling leaders to observe real processes, identify issues, assign actions and drive continuous improvement.

## Features

- Gemba planning & scheduling
- Structured observation checklists
- Mobile execution
- Action & ownership tracking
- Review & closure
- Dashboards & analytics

## Benefits

- Improved leadership visibility
- Faster corrective action closure
- Data-driven improvement decisions
- Reduced recurring issues
- Paperless and auditable

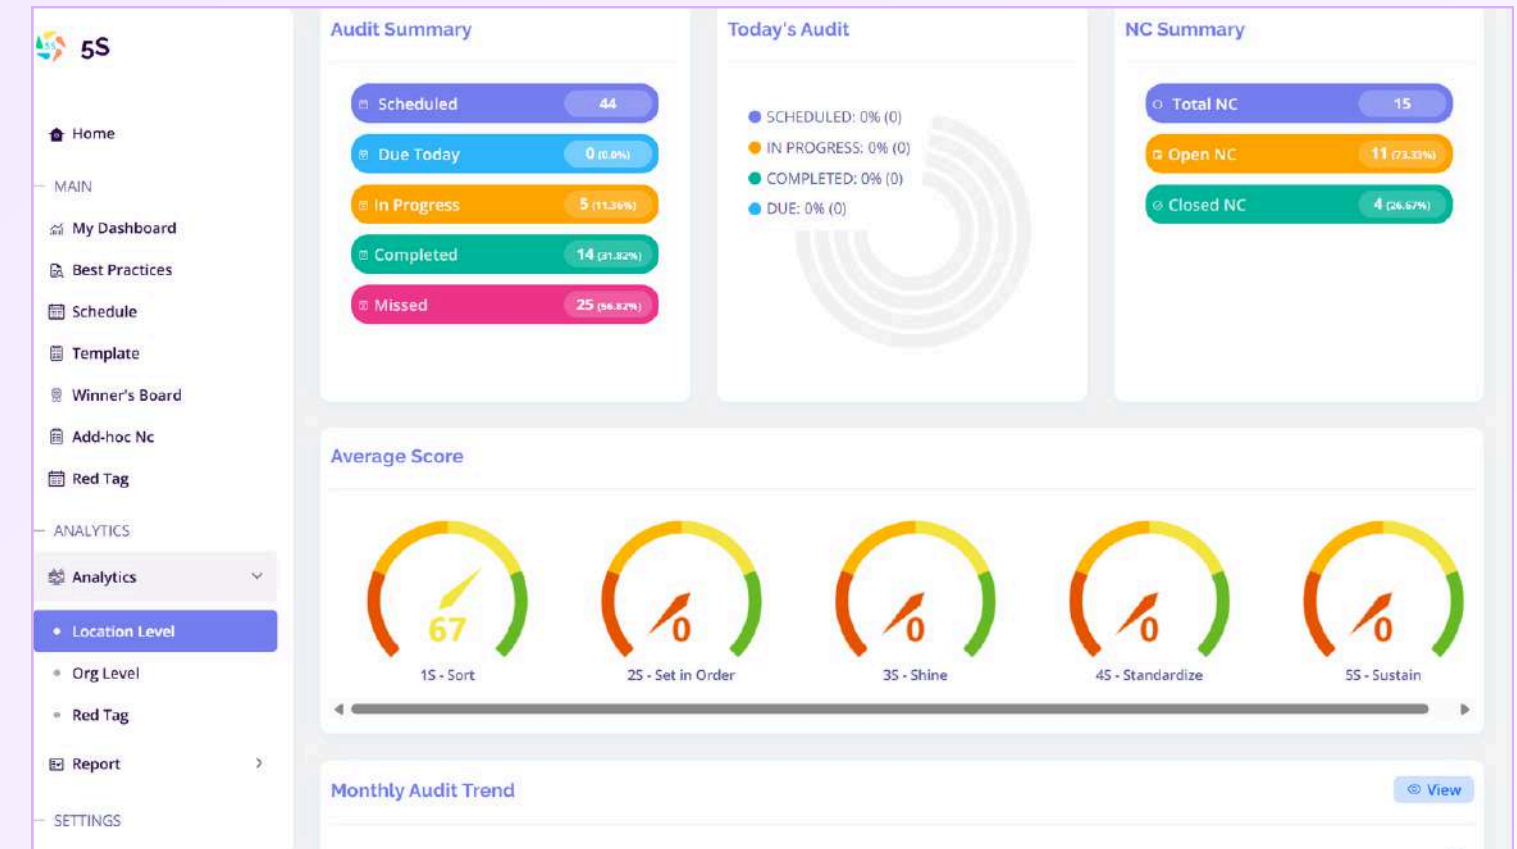

Digital 5S is a paperless, structured system to implement, audit, monitor and sustain workplace using digital checklists, visual evidence, dashboards, and action tracking.

## Features

- 5S audit & checklist management
- Photo-based evidence
- Non-conformance (NC) & action tracking
- Scheduling & reminders
- Winner's board
- Dashboards & analytics
- Role-based access control
- Complete red tagging provision

## Benefits

- Improved workplace discipline
- Faster issue closure
- Improved Safety, Quality & Productivity
- Reduced audit time
- Cost & resource optimization

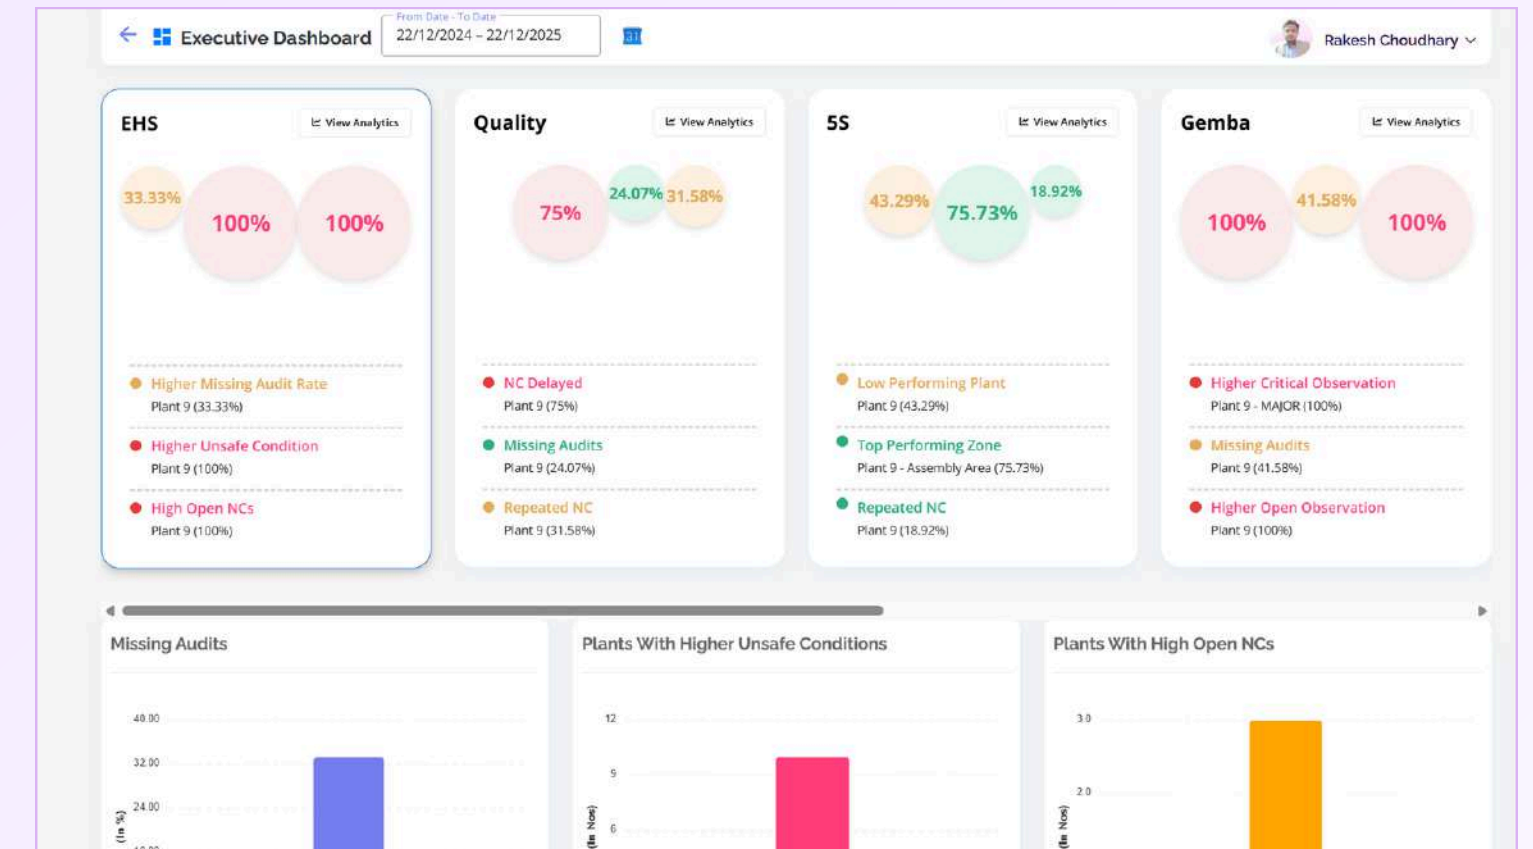

Systemized, paperless platform to capture, evaluate, implement and sustain small continuous improvements across the organization, ensuring visibility, accountability, and measurable benefits.

## Features

- Mobile app for submitting kaizen
- Photo-based before & after evidence
- Kaizen screening & approval workflow
- Kaizen implementation tracking
- Benefit quantification
- Dashboards & Analytics
- Role-based access control
- Recognition & Reward management

## Benefits

- Higher employee engagement
- Measurable business impact
- Sustained Continuous Improvement Culture
- Management Visibility
- Faster Improvement Cycle
- Transparency & Accountability

# EHS Excellence

## **SAFETY INSPECTION**

Enable organizations to identify hazards early, assign corrective actions, and track closure—all in real time

## **HIRA**

Digitizes hazard identification, risk evaluation, control implementation and residual risk review process—ensuring systematic risk management

## **PERMIT TO WORK**

Automates authorization, control, and monitoring of high-risk activities, ensuring work is carried out safely, compliantly and with full traceability

## **INCIDENT MANAGEMENT**

Provision of reporting, investigation, corrective action, and closure of incidents

## SAFETY INSPECTION

Digital Safety Inspection is a structured, paperless system to plan, conduct, track, and close safety inspections using mobile devices

### Features

- Inspection checklist management
- Conduct inspections on mobile, tablet, laptop
- Photo & evidence capture
- Non-conformance & action tracking
- Risk categorization
- Approval & closure workflow
- Dashboards & analytics

### Benefits

- Faster inspections & reporting
- Improved accountability
- Better risk control
- Real-time visibility
- Continuous safety improvement
- Audit & legal compliance

The screenshot displays the EHS Audit software interface. The top navigation bar includes the 'EHS Audit' logo, a dropdown for 'Plant/Unit' (set to 'Plant 9'), filters for 'Current Month', '1M', '3M', '6M', '1Y', and 'Custom' (set to '22 Dec, 2024 - 22 Dec, 2025'), and a user profile for 'Rakesh Choudhary'. The dashboard features five key metrics: '0 Weekly Schedule', '3 Pending Audits', '13 Pending Actions', '40 Total Audits', and '33 Total NCs'. Below these, there are tabs for 'Location NCs' and 'My NCs', with filters for 'All', 'Open' (17), and 'Closed' (16). The main table lists Non-Conformances (NCs) with columns for 'Nc No', 'Branch', 'Priority', 'Assigned On', 'Delayed By', 'Assignee', 'Status', and 'Actions'. The table contains 8 rows of data, showing various NCs with their respective details and status (e.g., 'Assign...', 'Closed...'). The bottom of the interface shows 'Page Size: 10' and '1 to 10 of 33'.

| Nc No    | Branch  | Priority | Assigned On  | Delayed By | Assignee        | Status    | Actions |
|----------|---------|----------|--------------|------------|-----------------|-----------|---------|
| NC-39-02 | Plant 9 | High     | 04 Dec, 2025 | 18         | Rahul Darade    | Assign... | ⋮       |
| NC-39-01 | Plant 9 | Medium   | 04 Dec, 2025 | 0          | Rakesh Choud... | Assign... | ⋮       |
| NC-37-01 | Plant 9 | Medium   | 10 Oct, 2025 | 0          | Harsh Purohit   | Closed... | ⋮       |
| NC-36-01 | Plant 9 | High     | 04 Sep, 2025 | 0          | Rakesh Choud... | Closed... | ⋮       |
| NC-35-01 | Plant 9 | High     | 22 Aug, 2025 | 121        | Rakesh Choud... | Assign... | ⋮       |
| NC-34-01 | Plant 9 | Medium   | 28 Jul, 2025 | 0          | Harsh Purohit   | Closed... | ⋮       |
| NC-33-01 | Plant 9 | High     | 28 Jul, 2025 | 0          | Harsh Purohit   | Closed... | ⋮       |
| NC-32-01 | Plant 9 | Medium   | 04 Jul, 2025 | 0          | Sachin Shinde   | Closed... | ⋮       |

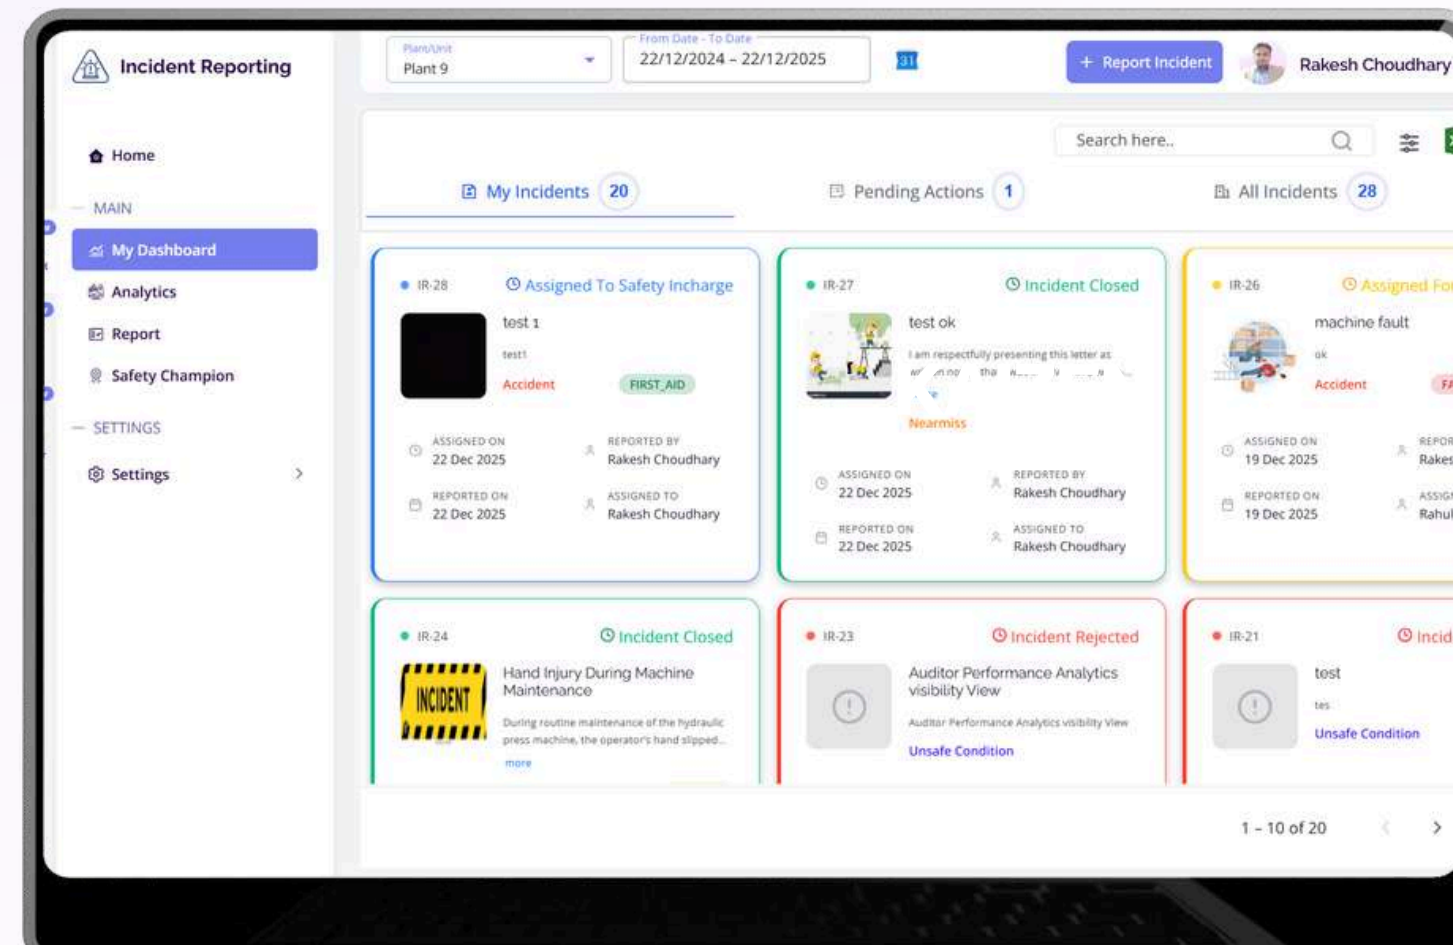

## INCIDENT MANAGEMENT

Structured, paperless system to report, investigate, analyze, and close incidents using digital workflows, ensuring root cause elimination, compliance and continuous improvement.

## Features

- Incident reporting
- Incident classification & severity
- Photo & evidence capture
- Immediate & containment actions
- Incident investigation
- Corrective & Preventive Actions (CAPA)
- Approval, verification & closure
- Dashboards & analytics

## Benefits

- Faster & accurate incident reporting
- Effective root cause elimination
- Improved accountability
- Proactive risk reduction
- Real-time management visibility
- Legal & ISO compliance

## HIRA

Digital HIRA is a structured, paperless system to identify hazards, assess risks, define controls and monitor residual risk using digital workflows, ensuring proactive risk management and compliance.

## Features

- Hazard Identification
- Risk assessment & rating
- Control measures management
- Risk reduction action tracking
- Residual risk review & acceptance
- Change & review management
- Dashboards & analytics

## Benefits

- Proactive risk prevention
- Standardized risk assessment
- Faster reviews & updates
- Better management visibility
- Strong legal & ISO compliance
- Audit & legal compliance

The screenshot displays the EHS Audit software interface. The top navigation bar includes 'EHS Audit', a dropdown for 'Plant 9', and filters for 'Current Month', '1M', '3M', '6M', '1Y', and 'Custom'. The user 'Rakesh Choudhary' is logged in. The dashboard features several key metrics: '0 Weekly Schedule', '3 Pending Audits', '13 Pending Actions', '40 Total Audits', and '33 Total NCs'. Below these, there are tabs for 'Location NCs' and 'My NCs', with filters for 'All', 'Open 17', and 'Closed 16'. The main table lists Non-Conformities (NCs) with columns for NC No., Branch, Priority, Assigned On, Delayed By, Assignee, Status, and Actions. The table shows 10 rows of data, including NC-39-02, NC-39-01, NC-37-01, NC-36-01, NC-35-01, NC-34-01, NC-33-01, NC-32-01, NC-31-01, and NC-28-01. The status of each NC is indicated by a colored box (e.g., 'Assigned For Action', 'Assigned For Coordination', 'Closed', 'Assigned For Verification'). The bottom of the screen shows 'Page Size: 10' and '1 to 10 of 33'.

| Nc No.   | Branch  | Priority | Assigned On  | Delayed By | Assignee         | Status                    | Actions |
|----------|---------|----------|--------------|------------|------------------|---------------------------|---------|
| NC-39-02 | Plant 9 | High     | 04 Dec, 2025 | 18         | Rahul Darda      | Assigned For Action       |         |
| NC-39-01 | Plant 9 | Medium   | 04 Dec, 2025 | 0          | Rakesh Choudhary | Assigned For Coordination |         |
| NC-37-01 | Plant 9 | Medium   | 10 Oct, 2025 | 0          | Harsh Purohit    | Closed                    |         |
| NC-36-01 | Plant 9 | High     | 04 Sep, 2025 | 0          | Rakesh Choudhary | Closed                    |         |
| NC-35-01 | Plant 9 | High     | 22 Aug, 2025 | 121        | Rakesh Choudhary | Assigned For Verification |         |
| NC-34-01 | Plant 9 | Medium   | 28 Jul, 2025 | 0          | Harsh Purohit    | Closed                    |         |
| NC-33-01 | Plant 9 | High     | 28 Jul, 2025 | 0          | Harsh Purohit    | Closed                    |         |
| NC-32-01 | Plant 9 | Medium   | 04 Jul, 2025 | 0          | Sachin Shinde    | Closed                    |         |
| NC-31-01 | Plant 9 | High     | 03 Jul, 2025 | 0          | Sachin Shinde    | Closed                    |         |
| NC-28-01 | Plant 9 | High     | 24 Jun, 2025 | 0          | Sachin Shinde    | Closed                    |         |

## PERMIT TO WORK

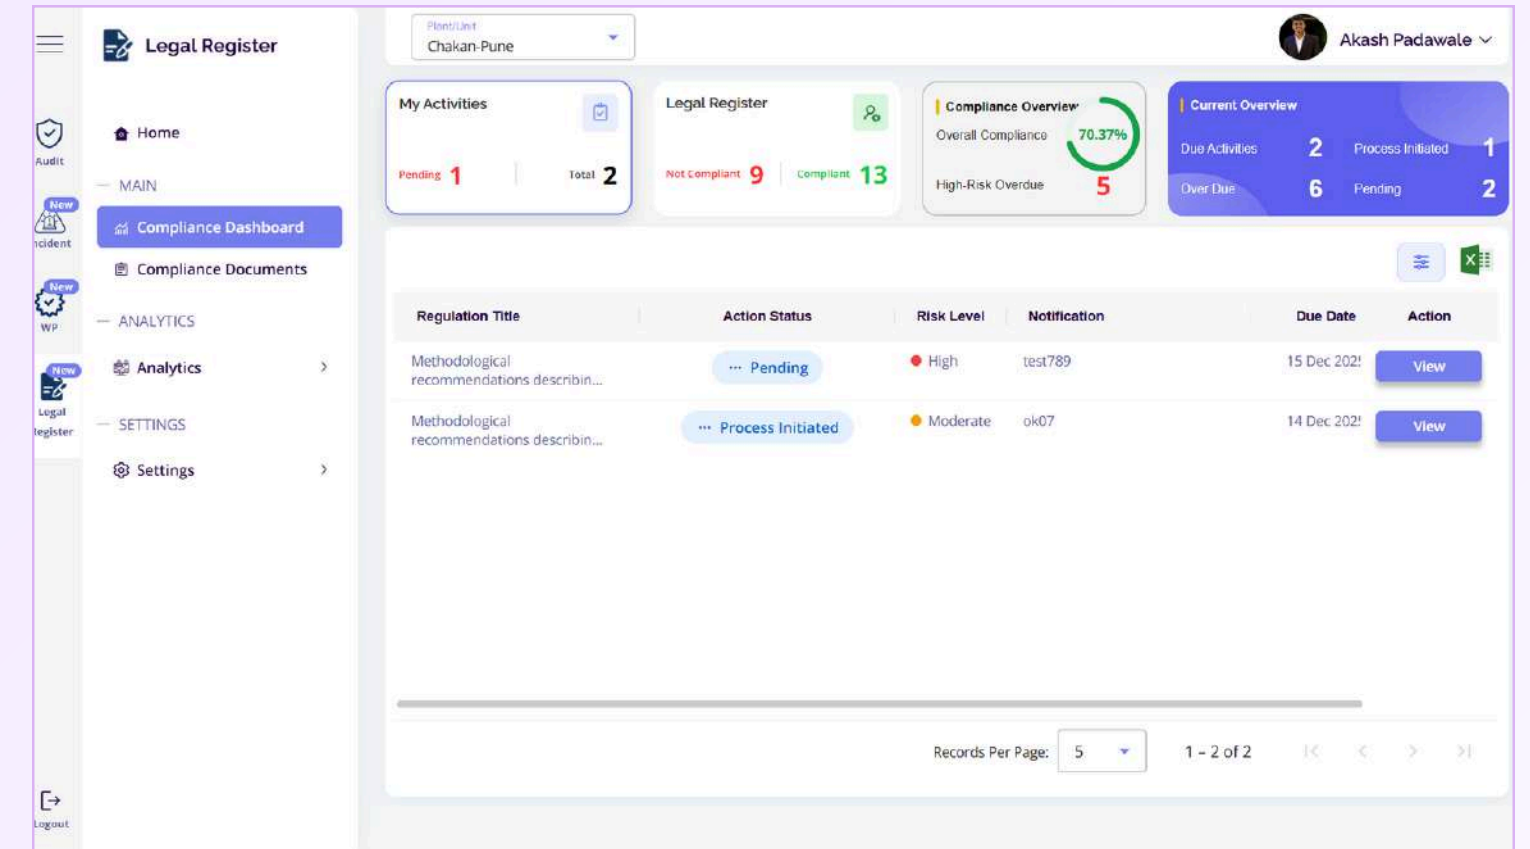

Digital Permit To Work (PTW) is a structured, paperless system to plan, authorize, execute, and close high-risk work safely using digital workflows, ensuring risk control, compliance and full traceability.

## Features

- Permit creation & work classification
- Hazard identification & risk controls
- Approval & authorization workflow
- Isolation & LOTO management
- Toolbox talk & worker acknowledgement
- Validity, extension & suspension
- Permit closure & verification
- QR code for displaying at work area
- Dashboards & analytics

## Benefits

- Strong control over high-risk work
- Faster permit processing
- Improved accountability & traceability
- Reduced accidents & incidents
- Real-time management visibility
- Legal & ISO compliance

# Audit & Compliance

## QUALITY AUDIT

Digitizes planning, execution, reporting and closure of quality audits to ensure consistency, traceability and faster corrective action

## LPA

Ensures daily process discipline by enabling frequent, role-based audits through a simple, fast and mobile-friendly system

## LEGAL REGISTER

Helps organizations identify, track, comply with and demonstrate compliance with applicable legal and statutory requirements

## SUPPLIER AUDIT

Digitizes supplier auditing, non-conformance tracking, and performance monitoring, ensuring supplier quality and compliance across your supply chain

## QUALITY AUDIT

Paperless system to plan, conduct, track, and close quality audits using digital workflows, ensuring compliance, defect prevention, and continuous improvement.

## Features

- Audit planning & scheduling
- Conduct inspections on mobile, tablet, laptop
- Photo & evidence capture
- Non-conformance & action tracking
- Corrective & Preventive Action (CAPA)
- Approval & closure workflow
- Dashboards & analytics

## Benefits

- Consistent & objective audits
- Faster audit cycles
- Better NC closure & prevention
- Real-time management visibility
- Improved compliance & customer confidence
- Continuous quality improvement

The screenshot displays the 'Quality' software interface. At the top, there's a header with 'Plant/Unit: Plant 9', a date range '22 Dec, 2024 - 22 Dec, 2025', and a user profile 'Rakesh Choudhary'. Below the header, a dashboard shows five key metrics: '0 Weekly Schedule', '10 Pending Audits', '9 Pending Actions', '76 Total Audits', and '56 Total NCs'. The main section is a table titled 'Location NCs' with columns for Branch, Nc No, Process, Priority, Assignee, Delay (Days), Assignee, Status, and Actions. The table lists several non-conformances, including 'NC-71-01' (High priority, Closed), 'NC-71-02' (Medium priority, Assigned For Action), 'NC-96-01' (Medium priority, Assigned For Coordinati...), 'NC-84-01' (Medium priority, Assigned For Verification...), 'NC-82-01' (High priority, Closed), 'NC-81-01' (High priority, Closed), 'NC-80-01' (High priority, Closed), and 'NC-77-01' (Medium priority, Closed). The bottom of the interface shows a 'Page Size' of 10 and '1 to 10 of 56' items.

| Branch  | Nc No    | Process      | Priority | Assignee     | Delay (Days) | Assignee      | Status                       | Actions |
|---------|----------|--------------|----------|--------------|--------------|---------------|------------------------------|---------|
| Plant 9 | NC-71-01 |              | High     | 11 Dec, 2025 | 0            | Sachin Shi... | Closed                       |         |
| Plant 9 | NC-71-02 |              | Medium   | 11 Dec, 2025 | 11           | Rahul Dara... | Assigned For Action          |         |

| Plant 9 | NC-82-01 | Resource ... | High     | 03 Oct, 2025 | 0            | Sachin Shi... | Closed                       |         |
| Plant 9 | NC-81-01 | Resource ... | High     | 03 Dec, 2025 | 61           | Sachin Shi... | Closed                       |         |
| Plant 9 | NC-80-01 |              | High     | 22 Sep, 2025 | 0            | Sachin Shi... | Closed                       |         |
| Plant 9 | NC-77-01 |              | Medium   | 29 Oct, 2025 | 58           | Sachin Shi... | Closed                       |         |

**LPA**

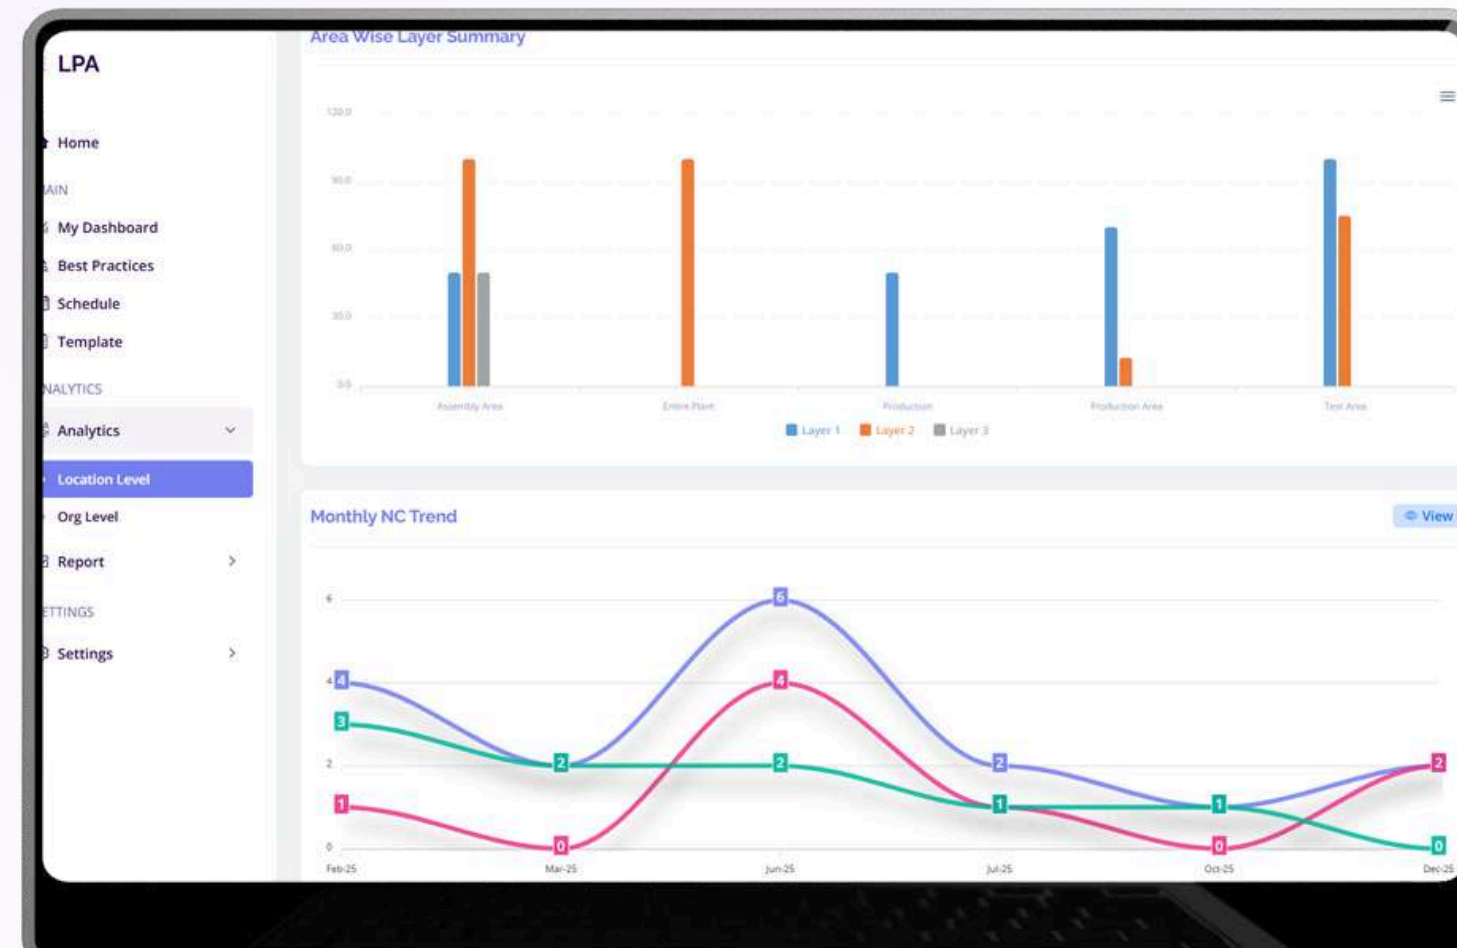

System to ensure critical process controls are consistently followed through frequent, role-based audits conducted at multiple organizational levels.

## Features

- Layered audit structure
- LPA planning & scheduling
- Digital checklists & scoring
- Non-conformance & action tracking
- Photo & evidence capture
- Verification & closure Workflow
- Dashboards & analytics

## Benefits

- Sustained process discipline
- Early detection of deviations
- Strong accountability at all levels
- Improved audit effectiveness
- Better management visibility
- Strong customer & IATF compliance

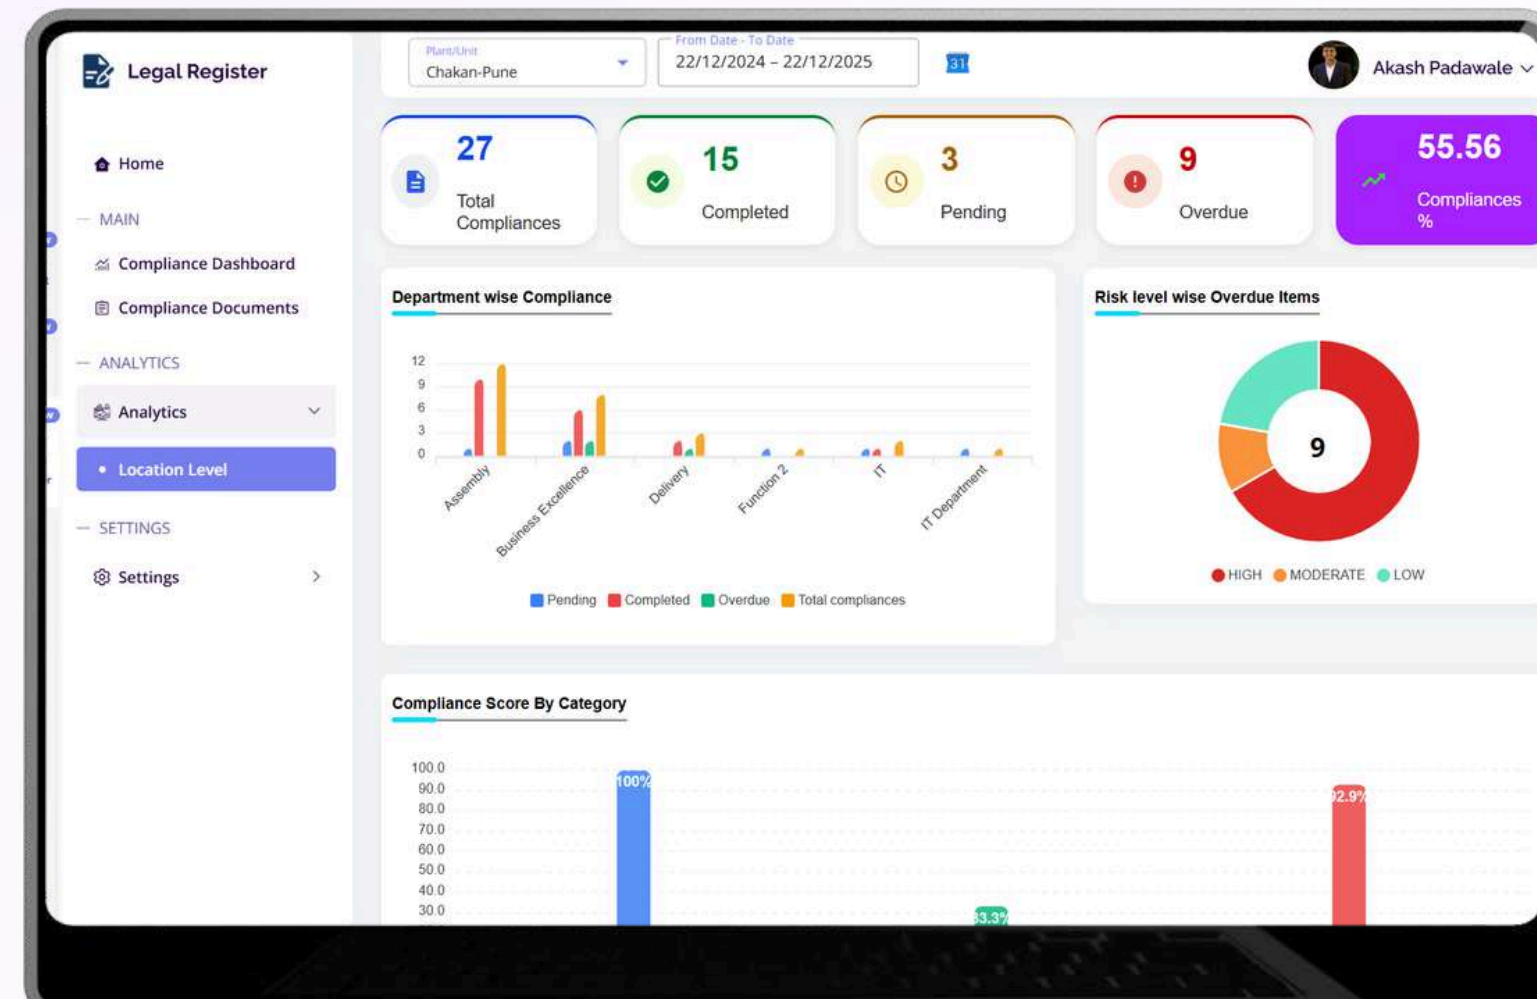

## LEGAL REGISTER

Centralized, paperless system to identify, track, comply with and monitor statutory and regulatory requirements, ensuring continuous legal compliance and audit readiness.

## Features

- Centralized legal register
- Applicability & compliance mapping
- Compliance obligation tracking
- Evidence & document management
- Approval & review workflow
- Alerts, notifications & escalation
- Compliance status management
- Dashboards & analytics

## Benefits

- Zero missed compliance
- Reduced legal & business risk
- Clear ownership & accountability
- Always audit-ready
- Better management visibility
- Standardized compliance across plants

## SUPPLIER AUDIT

Plan, conduct, evaluate, and improve supplier performance through digital audits, ensuring quality, compliance, and supply chain reliability.

## Features

- Supplier master & audit planning
- Digital audit checklists
- Non-conformance (NC) management
- CAPA & follow-up tracking
- Supplier performance dashboards
- Evidence & documentation
- Approval & review workflow

The screenshot displays the 'Supplier' dashboard. At the top, there are summary cards for 'Weekly Schedule' (0), 'Pending Audits' (1), 'Pending Actions' (0), 'Total Audits' (17), and 'Total NCs' (5). Below these is a table of audit records. The table has columns for Audit No, Supplier Name, Company Auditor, Template, Audit Category, Status, and Action. The status is color-coded: yellow for 'In Progress' and green for 'Completed'.

| Audit No | Supplier Name              | Company Auditor  | Template                 | Audit Category         | Status      | Action |
|----------|----------------------------|------------------|--------------------------|------------------------|-------------|--------|

| AUDIT-09 | Apex Casting Solutions     | Rakesh Choudhary | Issue Testing            | Sector 3A,             | Completed   | View   |

## Benefits

- Improved supplier quality
- Risk-based supplier management
- Faster audit cycles
- Strong accountability
- Data-driven supplier decisions
- Audit & customer confidence

# Employee Engagement

## **SUGGESTION**

Mobile app for employees to submit suggestion for improvement related to safety, quality, productivity, cost, morale, and environment

## **KAIZEN**

Enables organizations to capture, evaluate, implement, and sustain continuous improvement ideas in a structured, transparent, and measurable way

## **SGA**

Empowers frontline teams to solve everyday problems systematically, measurably, and sustainably

## **NEAR MISS REPORTING**

Mobile app to report, analyze, and prevent potential accidents before they occur

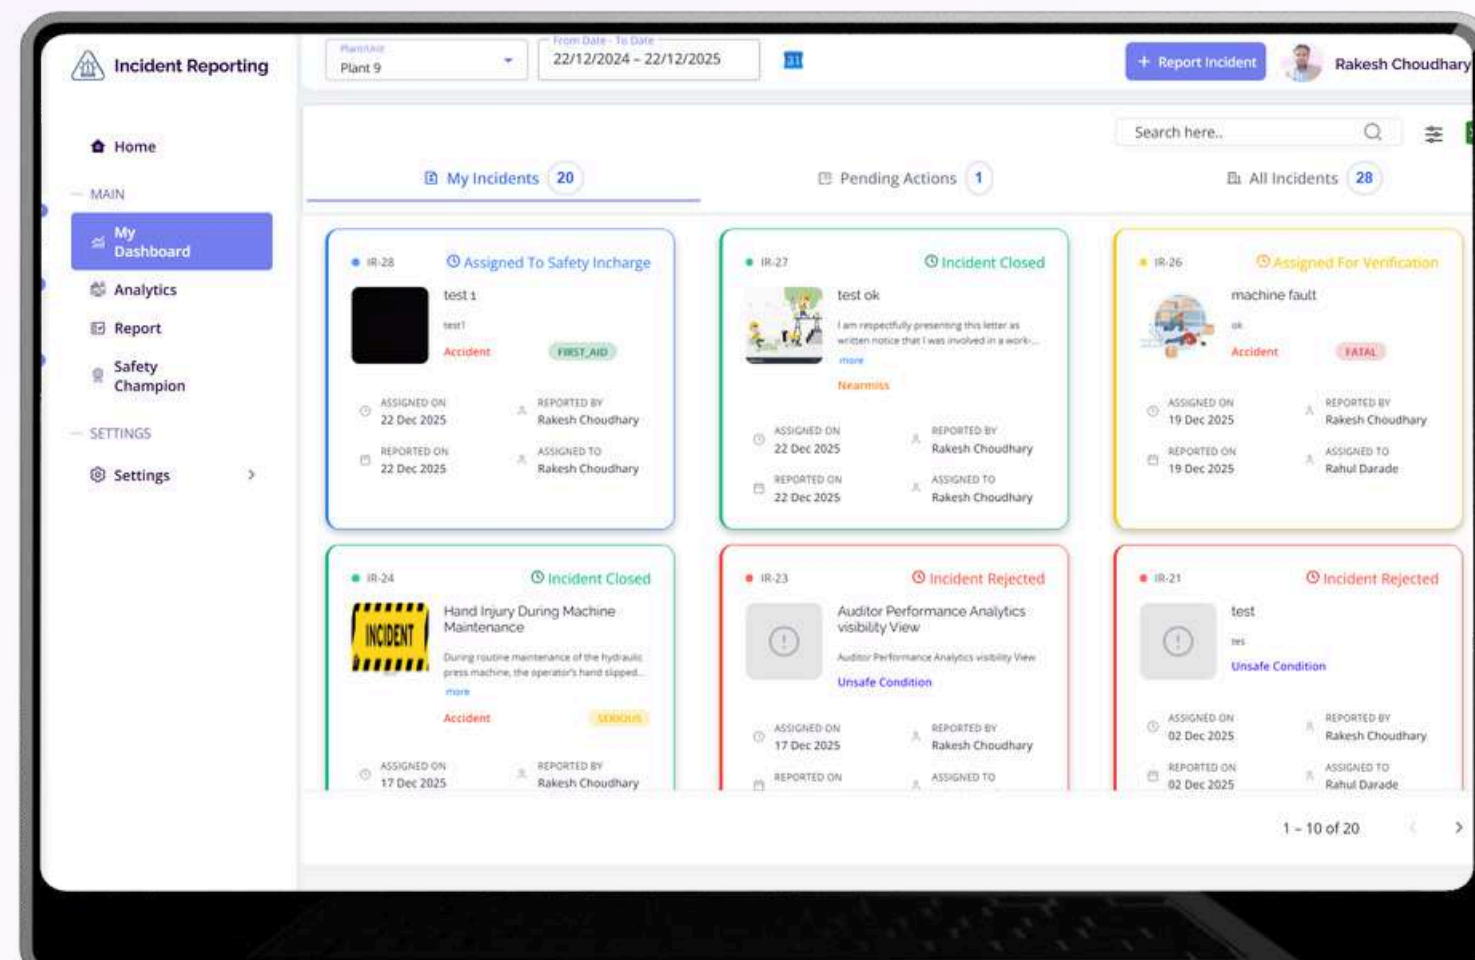

## NEAR MISS REPORTING

Enables employees to submit, track, evaluate, and implement improvement ideas, driving engagement and continuous improvement across the organization.

## Features

- Easy suggestion submission using mobile
- Screening & evaluation
- Implementation tracking
- Before–after documentation
- Benefit measurement
- Standardization & replication
- Recognition & rewards
- Dashboards & analytics

## Benefits

- Higher employee engagement
- Faster idea-to-implementation cycle
- Measurable business impact
- Transparency & accountability
- Strong continuous improvement culture
- Management visibility

## SUGGESTION

Employee engagement and continuous improvement tool that captures ideas from employees and converts them into measurable improvements—all through a paperless, trackable workflow.

## Features

- Easy Near miss reporting using mobile
- Near miss classification
- Photo & evidence capture
- Immediate & corrective actions
- Review & closure workflow
- Risk assessment & linkage
- Dashboards & analytics

## Benefits

- Proactive accident prevention
- Strong safety culture
- Faster response & closure
- Better risk visibility
- Management insight
- Audit & ISO support

**SGA**

Enables small teams (5–8 people from the same area) to capture problems digitally, apply simple problem-solving tools, track actions and results, share learnings across the organization

## Features

- Team & Area Management
- Problem Capture & Selection
- Simple Root Cause Analysis Tools
- Action Planning & Tracking
- Implementation Evidence & Verification
- Result & Benefit Measurement
- Standardization & Knowledge Sharing
- Review, Recognition & Rewards
- Dashboards & Analytics

## Benefits

- Strong employee engagement
- Faster problem resolution
- Continuous improvement culture
- Improved safety performance
- Better quality & productivity
- Skill & capability development
- Low-cost, high-impact improvements
- Knowledge sharing & standardization
